About the School

The School of Turfgrass Management provides three days of intensive, in-depth training in the biology, ecology, and cultural management of turfgrass. Technical information will be presented in lecture settings on the basic applications of turfgrass management applicable to golf course management, lawn care, athletic field management, and sod production. The knowledge will be integrated into hands-on case studies where attendees will work together to solve problems related to the lecture material.

The Goal

This School is designed to provide a basic foundation of turfgrass training for individuals with no formal education in turfgrass management or for those who desire a refresher.

Who Should Attend

Turfgrass managers and horticulturalists of all skill levels will benefit from the information presented in this school.
