TREES: UNDERSTANDING NEEDS AND PROBLEMS TO MAXIMIZE VALUE

Trees have a public value that goes well beyond the shading and cooling effects that are produced by healthy tree canopies. In fact, some estimates put the value of a mature tree between \$1,000 and \$10,000 dollars because the benefits of trees are so great. Additional benefits that trees provide include increasing property values, carbon sequestration and oxygen emission, and reduced runoff or erosion. Maximizing the value of trees means choosing/caring for them correctly. In this workshop you will gain a better understanding of how to choose and care for trees in Minnesota's climate. Presenters will also provide the latest information on tree pest issues, including Emerald Ash Borer and Oak Wilt. **EDUCATION POINTS WILL BE AVAILABLE**

SUPER TUESDAY AGENDA

<u>TIME</u>	<u>TOPIC</u>	<u>SPEAKER</u>
8:00	A Reasonable Approach to Landscape Diversity	Gary Johnson, University of Minnesota
9:00	Young Tree Care	Chad Giblin, University of Minnesota
